# Exploration

- Explore by neighborhoods with scopes
- Go from one point to another without navigating
- Mobile fullscreen experience

The screenshot shows the participation portal for the city of Zürich. At the top, there is a search bar, language selection (English), and user options (Sign Up, Sign In). The main header features the city logo and the text "Stadt Zürich". Below the header, a navigation menu includes "Participation Portal", "Current & Past Processes", "Basics for Participation", and "Information, Support & Legal".

On the left side, there is a sidebar titled "SCOPES" and "FILTERS". The "SCOPES" section lists several participatory processes:

- Dunkelhözli: Needs analysis and use s...
- Climathon Zürich: Climathon is a 32h Climat...
- Gebiet Sukkulenten-...: Information event on the m...
- «Euses Zürich: Take part in «Euses Zürich!»
- Schipfehof 2027: The Schipfehof is an a...

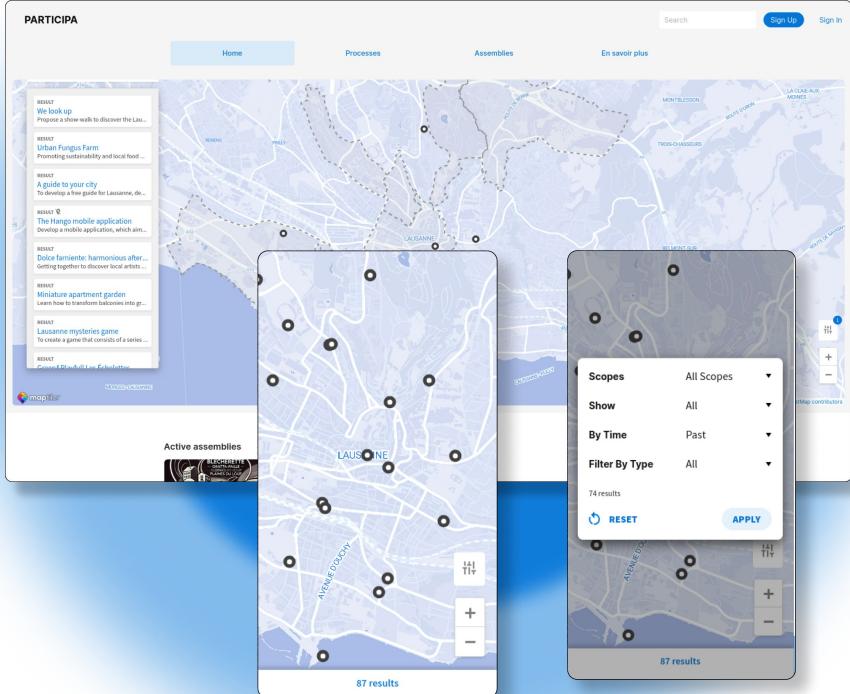

The "FILTERS" section is currently set to "Active (20)".

The central part of the page is a map of Zürich, showing various neighborhoods and landmarks. Overlaid on the map are numerous small circles, each representing an active process. A large, dashed blue circle highlights a specific area in the northern part of the city, likely corresponding to one of the listed scopes.

At the bottom of the map area, the text "20 active processes" is displayed, along with filter buttons for "Active (20)", "Past (37)", and "All (57)". On the far right, there are links for "Show All service departments" and a dropdown menu.

# Valorization

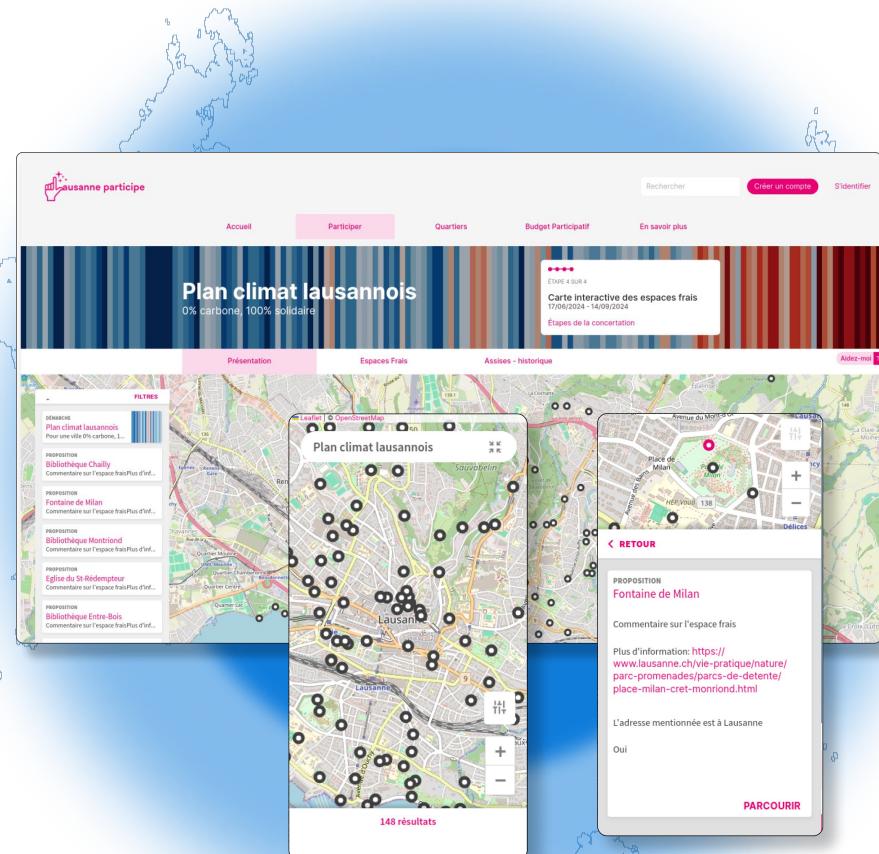

n

- Follow what have been decided
- Explore past and upcoming participation

# Use case: Citizens observatories

- Citizens can put on the map places they consider fresh.
- Each marker is assigned to a scope automatically
- On hot temperature, visitors can easily find a fresh spot near them

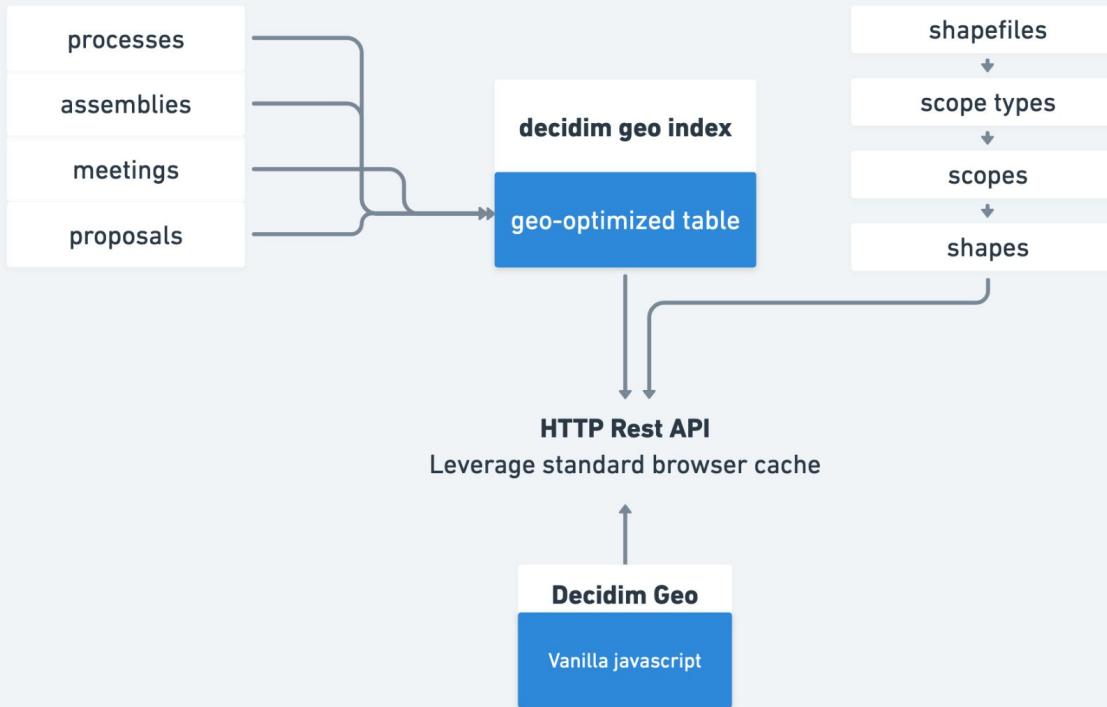

# Use case: Informed participation

1. Gather citizen-led data around water in a native territory (Brazil)
2. From the data gathered, gather proposals and organize debates
3. Create a territory governance processes, based on data.

# Technical aspect

# Roadmap: Toward Digital Common

**It's more fun when we are together. Octree wants to keep product at its best, while sharing ownership with others. For now, the plan is:**

- Open the module finance with Open Collective
- Clarifies releases cycles
- Design a clear governance around roadmaps

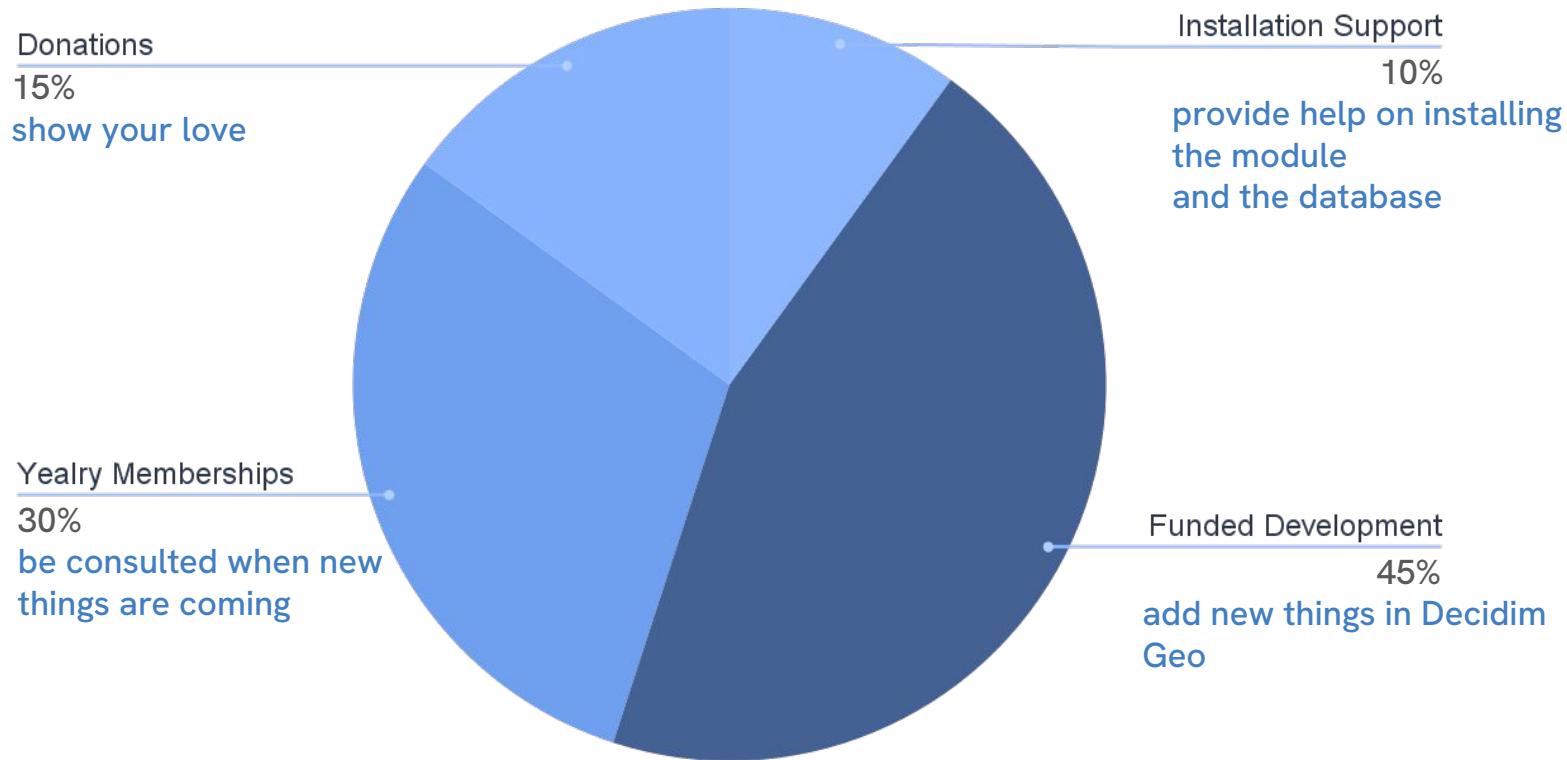

# Roadmap: Decidim Geo

**The roadmap is still a Work In Progress!**  
**But we already have some hints about what is waiting for us:**

- ✓ Create a proposal right from the map
- ✓ Handle large, very large data
- ✓ Go faster on finding things

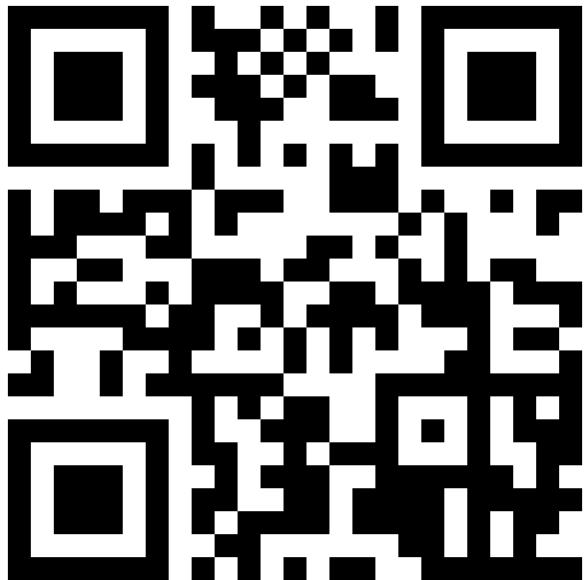

# Sustainability Model

To stay active and maintained, Decidim Geo uses four channels:

# Thanks!
